EDUCATION

University of Washington *Graduating Jun 2027*
BS, ***Human Centered Design & Engineering****. Interdisciplinary Honors Program. GPA: 3.94/4.00.* Seattle, WA

EXPERIENCE

Apple *Jun – Sep 2026*
Instructional Design Intern Cupertino, CA

- Authored and shipped 120 pages of **user guide content** for iPhone, iPad, and Mac, including high-profile Apple Intelligence features. Tested pre-release builds to track feature updates, wrote instructional copy, captured UI graphics, and **coordinated cross-functional review** with engineering, product marketing, and legal.
- Re-architected a **core internal AI tool**, expanding role from content expert to **direct codebase contributor** to reduce friction across writer workflows. Designed and evaluated **human-in-the-loop workflows** in partnership with content designers and engineers. Tackled an **undefined problem space** by challenging design assumptions, clarifying requirements, and translating broad workflow goals into targeted prompt improvements.
- Prototyped engaging, user-focused **product narratives** for the Tips app to help users discover new features. Collaborated with instructional designers and human interface designers to rapidly iterate on interface concepts.

University of Washington *Sep 2025 – Mar 2026*
Teaching Assistant: Foundations of Human-Centered Design I & II Seattle, WA

- Facilitated **design thinking** group projects for 5 teams (18 total students) by providing **targeted feedback and mentorship** that strengthened their collaboration, user-centered design skills, and technical communication.

Amazon Web Services *Jun – Sep 2025*
Technical Writing Intern Seattle, WA

- Engineered **AI workflows** that **accelerated diagram creation** from days to minutes for 200+ technical writers. Expanded scope from team- to org-level.
- Sought **high-impact initiatives** that raised the WCAG accessibility compliance, brand consistency, management, and overall quality of visuals in all AWS technical content. Aligned 5 cross-functional stakeholder teams to author a proposal with prioritized, data-backed action items for **org-wide diagram standardization**.
- Analyzed customer ticket data to identify feature-specific pain points. Designed SME-validated **architecture diagrams** to clarify the complex technical feature and address customer needs.

UW Natural Hazards Research Facility (NSF/NIH NHERI RAPID Facility) *Jan 2024 – Jun 2025*
Research Assistant Seattle, WA

- Authored **80+ pages of manuals** for drones and surveying antennas, enabling researchers of all skill levels to operate instruments safely and effectively. Structured documentation around **real-world user scenarios** by analyzing researcher workflows and common use cases.

PROJECTS & LEADERSHIP

UW Accessibility Club (HuskyADAPT) *Jan 2026 – Present*
Instructional Systems Chair, Executive Board Member Seattle, WA

- Built and directs the club's first-ever Instructional Systems program to **expand access to inclusive play**. Leads a 13-person team in improving the **accessibility** and **discoverability** of DIY assistive technology documentation.
- Translates a broad organizational vision into clear **research and design strategy** by establishing team structure, priorities, and workflows. Mentors students in **accessible technical documentation**, applying critical disability theory to practical documentation and design work.

UW Food Bank Research Group *Jun 2025 – Present*
Researcher, Designer, Co-Instructor: Human Centered Design & Engineering x Rainier Valley Food Bank Seattle, WA

- Conducts qualitative research and implements design solutions for the Rainier Valley Food Bank. Helps community members in South Seattle **navigate resources** and **access food** with greater ease and dignity.
- Designed icon-based **wayfinding signage** for the new community hub, improving navigation for clients with literacy or language barriers. Leads **user research synthesis** and **documentation** workflows, translating qualitative data and team discussions into clear, data-driven action items.

ADDITIONAL

Tools: prompt engineering, HITL, agents/skills • Figma, Miro • Python, Java, HTML, CSS, JavaScript • AutoCAD, Fusion360
Skills: content strategy • end-to-end UX design • inclusive design • program development • process optimization
Clubs: Engineers Without Borders (Webmaster) • Recital Choir • Advanced Treble Choir; **Awards**: Purple and Gold Scholarship
